

POST 4. BIRD SURVEY

Quietly and slowly walk in to the forest clearing, following the yellow marks on the trees so you can see the bird feeding station through the window at the back of the den. Stand there for 10 minutes and see how many birds you can count.

Try and identify any birds that you see (tick each one)

How many birds in total did you see?

How many different species did you see?

CLASSROOM ACTIVITY

See how many different birds you can find around your school grounds and find out the different things they eat
